NEXUS MANAGED SERVICES INCLUDE:

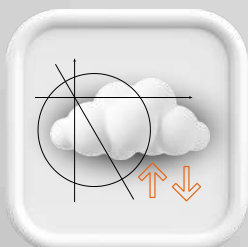

BACKUP SOLUTIONS

- Replica of physical machines to a cloud infrastructure - available within seconds
- Database replication to remote databases
- A backup solution that will meet your needs and that is budget-friendly

ON-SITE MAINTENANCE

MRJ Consultants offer a wide skill-set and specialisation ranging from network specialists, database administrators, security specialists, data gurus, a senior support team, and retail business process advisors - available to our maintenance clients

CLOUD MIGRATION + HYBRID CLOUD SOLUTIONS

MRJ Consultants offers host services and cloud migration solutions and platforms that will ease your transition to the cloud, migrating multiple platforms and services even some legacy systems to deliver a cloud-based experience.

SECURITY, ACCESS + SURVEILLANCE

As part of MRJ's product and service portfolio, we provide specialised surveillance security and access control systems, based on our years of experience in high-risk environments where multiple security measures and access control points are required. MRJ uses class-leading systems and provides installation, set-up support, and maintenance services. Our time and attendance software also integrates into most modern-day Access control systems.

COMMUNICATION + VOICE SOLUTIONS

MRJ offers various VoIP and unified communication solutions, with hybrid on-site/cloud PABX services at exceptional call rates. MRJ has partnered with leading Tier 1 communication suppliers to deliver call rates that deliver up to 60 % savings on traditional communication services. This service includes auto voice attendant, call recording capabilities all traditional PABX features, and the option of unified communication services with integration on multiple platforms.

SMS, OTP + MARKETING PLATFORM

SMS is still considered one of the best direct contact and communication channels available. MRJ provides a platform that delivers SMSs across all South African networks at a market leading rate with a platform that can deliver OTPs and security checks integrated into our Genesis platform. This service also acts as a direct marketing tool from our Genesis software where you can deliver personalised information or communication to your customer i.e. outstanding accounts, balances and current promotions. The SMS or OTP services are prepaid leaving you in control of your spend top-ups at any time.

INTERNET ACCESS AND WEB/MAIL HOSTING SERVICES

A comprehensive suite of connectivity services; Fiber, LTE, LTE-A, Wireless Broadband solutions, dedicated wireless solutions. MRJ is a service provider of agnostic and multiple partners in various areas to provide the best connectivity for our clients. Our hosting platforms are class leading and based on proven technology, with full management, or self-management, on Linux and Windows-based servers. The MRJ firewalls and spam detection services provide protection, security and customisation, and our hosting platforms are rooted in the latest technology that allows you to build and maintain a modern website.
